

Vietnam Environmental Webinar Showcase

June 2nd, 2022 | 14:00 - 17:00

As an emerging industrial hub with accelerating economic growth, Vietnam has severe environmental issues. In January 2022, the revised Law on Environmental Protection (LEP) 2020 came into effect. In general, the law highlights the responsibilities of ministries and localities to integrate circular economy in planning strategies, development plans, waste management, and waste recycling. The government has also demonstrated a strong dedication to tackle sustainable development and climate change at the Conference of the Parties (COP26) with its commitment to achieving net-zero carbon emissions by 2050.

Agilent offers over 40 years of environmental analysis and regulatory expertise. If you are involved in the measurement of organic and inorganic chemicals in water, soil, air, or food supplies, Agilent has the right solution instruments, accessories, consumables, and services designed specifically to meet your needs.

Agilent Technologies and partners are pleased to invite you to our virtual connection which is technology update session following our 2019 Environmental Workshop. We look forward to meeting you on June 2nd, 2022

Live Webinar Showcase

Date: June 2nd, 2022
